

Code of Ethics

The Code of Conduct of the "European Academy of Education" regulates the rules of conduct between academic staff, students and the school. It also sets out the principles of scientific, research and publication activities carried out by staff and students. It sets the rules so that the reputation of the school, staff and students is always preserved.

Table of Contents

1. Relationship between students and school staff	3
2. Students and studies	4
3. Scientific, research and publishing activities	5
Edition	6

1. Relationship between students and school staff

1. The relationship between the school staff member (especially the teacher) and the student is very important; both the school staff member and the student know their rights and responsibilities. The behaviour of school staff and students is based primarily on the principles of tolerance, mutual respect, respect for freedom of thought, opinion and expression.
2. The school staff member (teacher) promotes a tolerant and democratic approach in relation to learning and respects research findings and opinions based on these findings. Respects freedom to hold different political, religious and life views.
3. A member of staff shall treat students fairly and impartially, regardless of personal sympathies. Although the teaching and assessment of individual subjects requires uniform requirements, the teacher respects each student regardless of ethnicity, race, colour, gender, origin, mother tongue, age, medical condition, sexual orientation, religious or political affiliation.
4. School staff always consider students as partners/colleagues whom they seek to support in professional growth, professional development and critical thinking. Each staff member (teacher) is willing to assist students in their professional development according to their practical experience and knowledge.
5. The teacher will guide the students in their learning primarily for their benefit in order to motivate the students, facilitate their learning and arouse their interest in personal development.
6. A school employee shall not require activities from students that are not within his/her competence, nor shall he/she appropriate their work and the results achieved by them.
7. The school employee develops his/her skills, broadens and deepens his/her knowledge and practical skills in the field of his/her professional focus/education and teaching activities. He/she takes a collegial approach to the results of his/her colleagues and especially students, is open to discussion, arguments and new conclusions, even though these may be wrong.

2. Students and studies

1. The student tries to create, maintain and support the good name of the school by all his/her activities and behaves in a collegial manner.
2. The student is aware of the responsibility for the consequences of his/her actions. Uses the time devoted to study for personal and professional growth. Uses acquired knowledge and skills only in a lawful manner.
3. The student fulfils his/her study obligations responsibly, does not distribute or publish study materials, and participates in the fulfillment of his/her obligations on his/her own, with the exception of other assignments or collective work.
4. The student refuses to carry out activities and take actions that will or could lead to damage to the reputation of the school or to the disadvantage of the school or the student himself/herself. The student shall be mindful of his/her own and the schools reputation.
5. The student must comply with the principles for working with information according to GDPR, especially when working with computers, does not misuse information for personal benefit, does not use other peoples computer resources without the owners consent, does not appropriate the results of other people without their consent or according to the law. The student does not use other peoples computer access and does not infringe copyright. The student is aware of the personal and social consequences when working with information resources, looks at the credibility of information and does not use disinformation sources.
6. The student shall in no case commit fraud, especially in the sense of plagiarism and appropriation of the results of other peoples work. He/she shall always act in accordance with the schools instructions and the law. Comply with ISO 690.

3. Scientific, research and publishing activities

1. The school staff (especially teachers) focus their research or publication activities on the dissemination of knowledge, general education, technical innovation, etc. They make sure that their results serve to benefit and enhance the prestige of the school, students and society.
2. A school employee shall promote freedom of publication, research, expression, exchange of views and information in the field of scientific, academic or other creative activity. He/she may also present the unsuccessful conclusions of his/her research and scientific findings. The school employee recognizes that his or her freedom to publish is limited by applicable laws.
3. A school employee who conducts scientific, research or publication activities is responsible for their objectivity and credibility. When publishing his/her findings, conclusions and work, he/she shall ensure their completeness, verifiability and objective interpretation.
4. A school employee or student who is involved in research or publication activities shall only be presented as an author or co-author if he or she has achieved or contributed significantly to any results. Any form of plagiarism shall be strictly avoided. Publications shall objectively acknowledge the contribution of colleagues and predecessors and shall always give a clear and precise reference to the relevant source or work when citing (according to ISO 690).
5. A school employee who carries out an assessment, review or other evaluation activity shall always do so personally, independently and carefully. He/she shall take care to protect the intellectual property of the authors of the material under review and shall not abuse it for his/her own benefit. He/she shall not provide the materials under review or any other materials to third parties prior to their publication and shall refuse to provide expert or other opinion if his/her conclusions could be influenced by his/her personal interest or if he/she would have a conflict of interest.
6. All scholarly, research or publication activity that is generated within the school by a school employee or student is the property of the school. The School has the right to dispose of such materials as it sees fit. This does not apply to patents or classified material. All student work (theses, term papers, publications, research papers, projects, etc.) is public and is published by the school.
